Civil Engineers – Water & Utilities

Burroughs is a family-owned business specialising in civil & structural engineering and project and cost management consultancy based in Cardiff. We are a sustainably growing business with over 50 staff. We have been in business since 1988 and we have developed a reputation within the water sector for both practical and innovative designs and an ability to engineer solutions to make complex schemes successful.

Job Summary

We are looking for bright, enthusiastic, and open-minded individuals to join our friendly team in Cardiff to deliver the exciting multi-billion-pound pipeline of work that is required by the UK Water Authorities during AMP 8 and beyond.

Working within a dynamic team and overseen by a Senior Engineer and Principal Engineer, you will contribute to the delivery of the Civil Engineering design on a range of challenging projects across the water sector including but not limited to: New and replacement potable water mains, foul drainage including CSO remediation works, and both Sustainable Urban Drainage and conventional surface water drainage design.

The role is challenging, varied, and you will thrive solving engineering problems. We look after our clients; their work challenges us, stimulates us, and allows us to be proud of our contribution to a changing world. We would therefore expect you will want to work and support a culture in which employees take pride in their work and are focused on customer service. We look after our staff and invest energy in their technical, academic and professional development.

Skills / Qualifications Required

- ☐ 3+ years' experience in the Water Industry with potable, surface, and foul water design and/or construction;
- ☐ Civil Engineering degree - Preferably a Masters;
- ☐ Have measurable progression with or be willing to work towards Professional Qualification with the Institution of Civil Engineers or Chartered Institution of Water and Environmental Management;
- ☐ Adept at 3D design and modelling using software such as MicroDrainage and/or InfoDrainage;
- ☐ Water Authority statutory approval processes such as S104, S106 etc;
- ☐ SuDS Approval Body involvement;
- ☐ Ability to manage concurrent projects ensuring prioritisation of tasks and deliverables to ensure effective delivery
- ☐ Ability to work using own initiative and demonstrate a methodical approach;
- ☐ Excellent written and verbal communication skills;
- ☐ Ability to work well independently and as part of a team;
